

# The World Remade America In World War

The United States entered World War II on December 7, 1941, after the Japanese attack on Pearl Harbor. The war had a profound impact on the United States, both at home and abroad. It led to the mobilization of the American economy and society, the development of new technologies, and the strengthening of the American military. The war also had a major impact on American politics and culture, and it helped to shape the United States into the global superpower that it is today.

## The Mobilization of the American Economy and Society

The United States entered World War II with a peacetime economy. The war effort required a massive mobilization of the economy, and the government took steps to convert factories to produce war goods, ration scarce resources, and control prices. The war also led to a major increase in the size of the American military, and millions of men and women were drafted into service.

The mobilization of the American economy and society had a profound impact on the country. It led to a sharp increase in economic growth, and it helped to create a more egalitarian society. The war also gave women new opportunities to work outside the home, and it helped to break down racial barriers.

### **The Development of New Technologies**

World War II was a major catalyst for the development of new technologies. The war effort led to the development of radar, the atomic bomb, and the computer. These technologies would have a profound impact on the world after the war, and they helped to make the United States the leading technological power in the world.

### **The Strengthening of the American Military**

The United States emerged from World War II with the most powerful military in the world. The war had led to a massive increase in the size of the American military, and the United States had developed new weapons and technologies that gave it a significant advantage over its potential enemies.

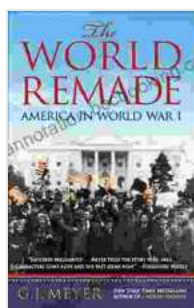

The strengthening of the American military had a profound impact on the world. It helped to deter the Soviet Union from further aggression, and it played a major role in the Cold War.

### **The Impact on American Politics and Culture**

World War II had a major impact on American politics and culture. The war led to a decline in isolationism, and it helped to create a more internationalist outlook in the United States. The war also led to a greater appreciation for diversity, and it helped to break down racial barriers.

The war also had a significant impact on American culture. The war inspired a number of works of art, literature, and music. It also led to a new sense of national unity, and it helped to create a more cohesive American identity.

World War II was a transformative event in American history. It had a profound impact on the country's economy, society, politics, and culture. The war helped to shape the United States into the global superpower that it is today.
