## By Barış Usta

Autism is a neurodevelopmental disorder that affects how a person interacts with the world. People with autism may have difficulty with social interactions, communication, and repetitive behaviors. Autism is often seen as a disability, but it can also be seen as a different way of thinking and experiencing the world.

In his book *Unstrange Minds: Remapping the World of Autism*, Barış Usta challenges the conventional wisdom about autism and offers a new way of understanding and supporting autistic individuals. Usta argues that autism is not a disorder but a different way of thinking and experiencing the world. He draws on the latest research in neuroscience, psychology, and education to provide a comprehensive and nuanced account of autism. He also offers a wealth of practical advice for parents, educators, and

clinicians on how to create a more supportive and inclusive environment for autistic people.

*Unstrange Minds* is a groundbreaking book that has the potential to change the way we think about autism. It is a must-read for anyone who wants to learn more about this complex and fascinating condition.

## **Reviews**

"*Unstrange Minds* is a brilliant and compassionate book that challenges the conventional wisdom about autism. Barış Usta provides a nuanced and comprehensive account of autism, drawing on the latest research in neuroscience, psychology, and education. He argues that autism is not a disability but a different way of thinking and experiencing the world. This book is a must-read for anyone who wants to learn more about autism and how to create a more supportive and inclusive environment for autistic people."

**—Temple Grandin, author of *Thinking in Pictures* and *Animals in Translation***

"*Unstrange Minds* is a groundbreaking book that has the potential to change the way we think about autism. Usta's insights are sharp, his arguments are persuasive, and his writing is both clear and engaging. This book is a must-read for anyone who wants to understand autism and its implications for our society."

**—Steve Silberman, author of *NeuroTribes: The Legacy of Autism and the Future of Neurodiversity***

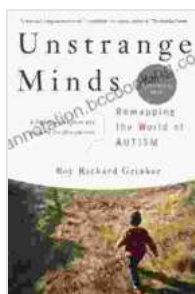

## **About the Author**

Barış Usta is a Turkish-American neuroscientist and autism advocate. He is the author of several books on autism, including *Autism Spectrum DisFree Downloads: A New Perspective* and *The Autism Revolution: A Guide to the Latest Advances in Autism Research and Treatment*. Usta is a frequent speaker at conferences and workshops on autism, and he has been featured in numerous media outlets, including *The New York Times*, *The Washington Post*, and *The Wall Street Journal*.

Usta's work has been praised by leading experts in the field of autism, including Temple Grandin and Steve Silberman. He is a passionate advocate for the rights of autistic people, and he is dedicated to creating a more inclusive and supportive world for all.
